Cloud Engineer

Ambitious Cloud Engineer with foundational knowledge in cloud computing, focusing on AWS services such as EC2, S3, and Lambda. Strong understanding of infrastructure-as-code using Terraform and automation tools like GitHub Actions. Eager to apply skills in cloud architecture, deployment, and monitoring to solve real-world challenges.

Formation

- **Technology in Systems Analysis and Development - Senac, completion in 2023**
- **Postgraduate Lato Sensu Cloud Computing - Senac, completion in 2024**

Additional information

Proficient in Java, Spring, Python, HTML, CSS, and AWS services such as EC2, Lambda, S3, DynamoDB, VPC, and Route 53, as well as other technologies like Terraform and GitHub Actions.

Professional experience

Experience was and is gained through hands-on projects, including the Cloud Resume Challenge and a portfolio website, with more projects in development to showcase evolving skills.
